Through the Lens: What Australia's Wildlife Photos Reveal

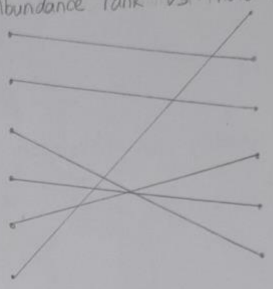

Introduction

Section 1: What get photographed

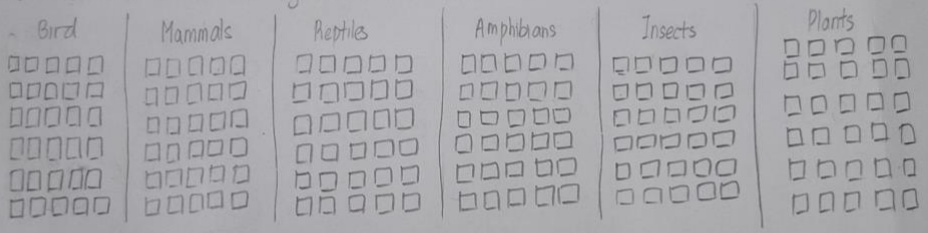

Who Get the Spotlight

Abundance rank vs. Photo rank

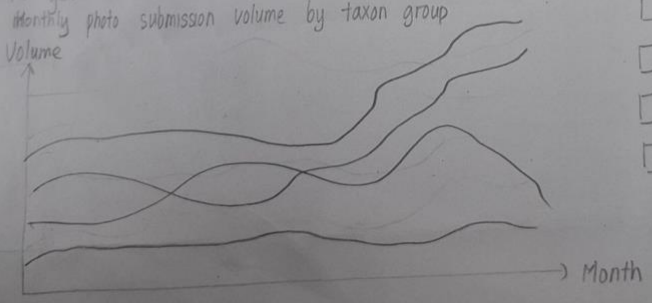

The Threatened and the Ignore (1icon = 1 species)

O Many Photos O Few Photos O No photos

A year in the lens

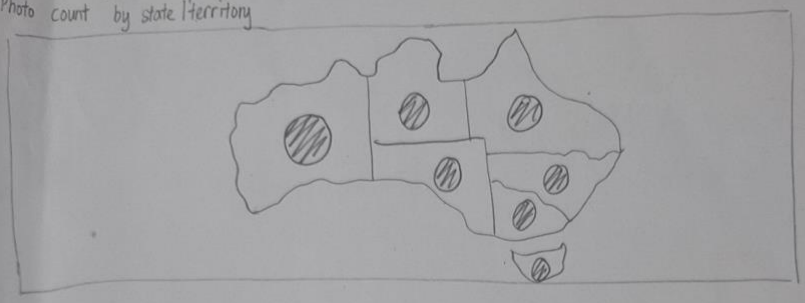

Monthly photo submisson volume by taxon group

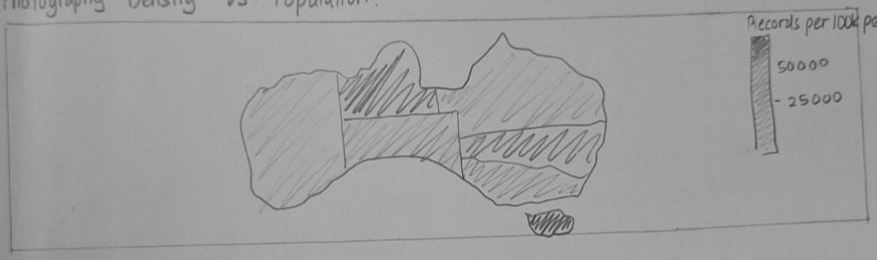

- Plants
- Insects
- Reptiles
- Birds

Section 2 : Where photography happens

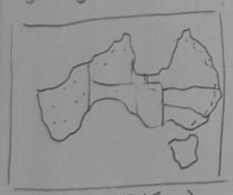

Where the camera point
Photo count by state / territory

Photography Density vs Population.

Following the Season
migratory whale records (4 months snap shots)

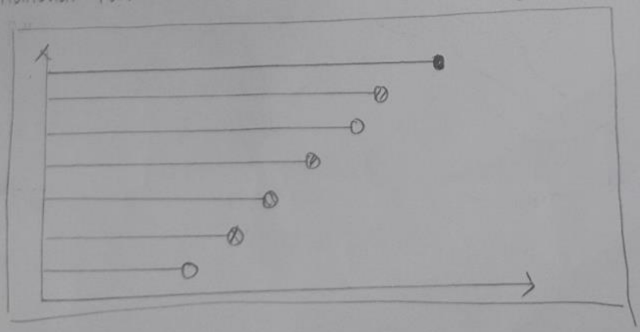

Summer (Jan)

Autumn (Ap)

Winter (Jul)

Sping (oct)

National Park In Focus - Park sized / coloured by photo record per km^2

Section 3: The conservation Argument

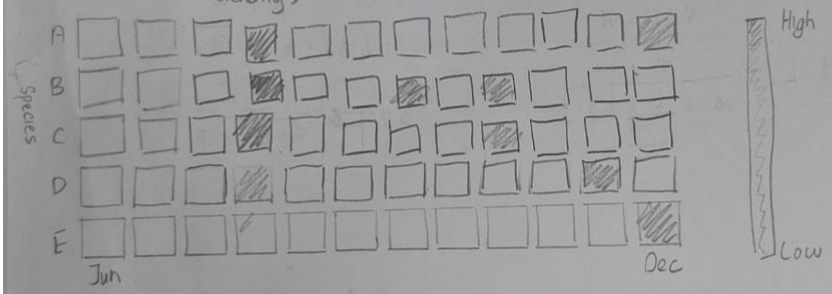

The Protection Gap

☐ State Only (No Federal Protection)

▨ Also Fedral Protected

When Are they Seen?
(Photo-record density)

From camera to Conservation
